Beautiful heirlooms
to be handed down from
generation to generation.

Statesville Chair Company

Traditions in Excellence

Drawing inspiration from the work of prominent 18th Century cabinetmakers, Statesville Chair Company is committed to bringing the grace and serenity of earlier times into the fast-paced modern world. The classic themes of the past dominate the world of interior design, and Statesville Chair's diversity of styles and decorative details offers tremendous latitude of individual expression.

Each carefully chosen style has been reproduced by skilled craftsmen using the best quality fabrics, and carefully finished, carved mahogany. Although technology advances have allowed for a higher degree of disability, almost every step in the manufacturing process is still performed by human hands. The hidden features of quality construction parallel the time-honored joinery techniques of yesteryear, and each piece is finished and hand rubbed to create a collector's item—a beautiful heirloom to be handed down from generation to generation.
